PCCW/HKT Internship Programme, Summer 2023

A well-structured talent-nurturing initiative, PCCW/HKT Internship Programme offers university students rewarding opportunities to participate in interesting real-life business processes under a leading technology company. The aim of the programme is to empower interns to bring in innovative and refreshing mentalities to our expert teams as well as cultivate their own capabilities and experience to strengthen their career readiness.

To build a base for their prospects, interns will be paired with experienced mentors or supervisors to learn and explore in the workplace. They will work on tasks to apply their ideas and skills, obtain hands-on experience and knowledge from industry leading experts, and engage in various activities to expand professional network.

Our programmes cover STEM & non-STEM internship positions under diverse business groups, including Commercial Group, Engineering, Group Human Resources, HKT Home, Information Technology and PCCW Global. University students from different academic backgrounds are welcomed to apply.

Programme details and application

Details about internship programmes are available here. If you are interested in joining our talented teams, please indicate two preferences in your application.
