

Course Overview

NURS N103F Fundamental of Nursing Practice 基礎護理實務

Programme	Bachelor of Nursing with Honours in General Health Care Bachelor of Nursing with Honours in Mental Health Care
No. of credits	10
Level	Foundation
Study year	Year 1
Duration	Two terms (Autumn and Spring Terms)
Medium of instruction	English
Pre—requisites	Nil
Contact hours	188 hours
Teaching & learning strategies	Lecture (4 hours x 26 weeks) Laboratory session (2 hours x 25 weeks) Supervised practice (2 hours x 17 weeks)
Assessment	Continuous assessment <ul style="list-style-type: none">• Written test• Practical assessment 1• Practical assessment 2
	Examination <ul style="list-style-type: none">• Written examination (3 hours)
	Criteria for a Pass Grade: Pass in both continuous assessment and examination

Course Team:

Course leader:

-Class A: Ms Chan Kor Yee, Claudia (Email: koychan@hkmu.edu.hk)

-Class B: Ms Fong Nga Yee, Rachel (Email: myfong@hkmu.edu.hk)

Teaching team member:

-Class A: Ms Kwok Yuen Ming, Ivy (Email: ikwok@hkmu.edu.hk)

-Class B: Dr Yang Wai Lam, Caroline (Email: cwlyang@hkmu.edu.hk)

Aim

This course aims to equip students with the fundamental knowledge and skills crucial for the provision of basic care to clients with health care needs.

Course intended learning outcomes (CILOs)

Upon completion of the course, students should be able to:

1. describe professional nursing concept and health care environment;
2. explain the principles of fundamental of nursing;
3. demonstrate safe performance of fundamental nursing procedures;
4. give an account of admission and discharge of a patient;
5. describe principles of infection control and perform related skills to prevent cross infections;
6. describe loss, grief and death experienced by patients.

Course Content

- Introduction to professional nursing
- Health care environment
- Principles of recording and reporting
- Nursing knowledge and skills related to:
 - Bed making
 - Vital signs
 - Comfort and personal hygiene
 - Hot and cold therapies
 - Rest and sleep
 - Nutritional care
 - Respiratory care
 - Body mechanics and positioning
 - Admission and discharge
 - Medication administration
 - Intravenous therapy and blood transfusion
 - Wound care
 - Infection control
 - Urinary and bowel elimination
 - Specimen collection
 - Exercise and ambulation
 - Loss, grief and death

Teaching and Learning Strategies

Lectures, laboratory sessions and student practice sessions (SPS) are the major strategies employed in this course to facilitate students achieving the learning outcomes.

Lectures:

Lectures provide theoretical input of fundamental knowledge on course topics. Students are expected to develop a solid knowledge by attending lectures.

Laboratory sessions:

Laboratory sessions aim at providing students with hands-on experience on basic nursing care for clients, in order to facilitate their understanding of knowledge and skills that have been conceptually presented in lectures.

Student practice sessions (SPS):

SPS aim at providing students with chance to practice basic nursing care for clients to consolidate the skills that have been learnt in laboratory sessions.

Online learning environment (OLE):

The online learning environment (OLE) is an interactive online learning platform that serves 3 purposes: 1) announce course-related information, 2) release teaching and learning materials, and 3) provide a platform for communication among teachers and students.

Other learning resources:

Designated textbooks and suggested references available to facilitate students' learning on the concepts in fundamental nursing care.

Attendance requirement

Starting from the 2024 intake and thereafter, the mandatory overall attendance requirement is $\geq 90\%$. Attendance in both lectures and laboratory sessions will be taken using iAttend and/or hardcopy. Students are responsible for ensuring their attendance is recorded before the end of each teaching activity. Each electronic device can be used for only one student. Multiple attendance taking using the same electronic device is not accepted and no attendance taken by such device will be counted. Retrospective attendance taking is NOT allowed.

A make-up system is available for students whose attendance falls no less than 80%. However, completion of a make-up arrangement does not offset any absences. All absences will be accumulated until the end of the course.

Course coordinators reserve the right for allowing make-up work if students' absent in multiple learning activities without justification.

Course Assessment

Course assessment includes continuous assessment and examination. The proportion of each aspect towards the overall course score is indicated as follows:

Continuous assessment: Written test (15%) – Week 11 in Autumn term
 Practical assessment 1 (15%) – Week 14 in Autumn term
 Practical assessment 2 (20%) – Spring term

Examination: Written examination (50%) – Exam week in Spring term

A written test is used to assess students' ability to understand the knowledge covered in lectures in autumn term. It constitutes 15% of the overall course score (i.e. 30% of the overall continuous assessment score).

2 practical assessments are used to assess students' ability to perform fundamental nursing skills covered in autumn term and spring term respectively. They constitute 35% of the overall course score (i.e. 70% of the overall continuous assessment score).

A written examination is used to assess students' ability to understand the knowledge covered in lectures in autumn term and spring term. It constitutes 50% of the overall course score (i.e. 100% of the overall examination score).

Students should get a pass in both overall continuous assessment score and overall examination score, in order to get a pass in this course. The passing mark is 40.
