Professor Chen Zhi graduated from Tsinghua University with a Bachelor's Degree in Chemical Engineering. He has dedicated his career to teaching, scientific research and education management. As a scientist, Professor Chen has achieved exceptional success in his research on nuclear chemical engineering, ferrous metal technology and the structure of coordination compounds. As an educator, Professor Chen is especially keen to keep students motivated to learn, as he firmly believes in the value of nurturing young people to pursue lifelong learning.

Professor Chen's teaching career focused on nuclear chemical engineering until 1990. From 1988 to 1989, he served as a visiting scholar in the Netherlands, where he studied the structure of the coordination compounds of lanthanides using the Nuclear Magnetic Resonance technique. After returning to China, he was appointed Director of the Academic Affairs Office and Deputy Registrar of Tsinghua University.

From 2000 to 2002, he served as Vice President of the Zhongguancun Institute for Innovation in Beijing. He also served as the first President of Shunde Polytechnic in Guangdong from 2002 to 2009 and has been its Deputy Party Secretary since 2002.

Professor Chen has devoted his time both to education and to scientific research. He has published a number of academic papers and gained a substantial amount of recognition, including winning the second prize of the National Environmental Protection Technology Award and the Second-Class National Teaching Excellence Award.

Under Professor Chen's leadership and in line with his longstanding commitment to lifelong learning, Shunde Polytechnic signed a cooperation agreement with the OUHK in 2004 to launch a Master of Business Administration programme for senior executives in mainland China.
