# Programme Introduction

With the growing demand for healthcare services due to demographic trend of longevity, complexity of diseases spectrum, and rapid development of medical technologies, the advancement of professional competence of nurses is needed. It is imperative for nurses not only assuming a more advanced role, but also engaging in the functions and responsibilities with expanded scope and increased complexity. It has been recognised as a global trend to promote advanced and specialised nursing practice.

The programme is designed for nurses who are planning to enhance their professional development in the specialty area:

## **Specialisation in Advanced Respiratory Nursing:**

Nurses who are currently working in Respiratory Unit, Medicine and Geriatrics Unit, High Dependency Unit, Ventilator Care Unit or those who are interested in respiratory nursing.

## **Specialisation in Management and Leadership:**

Nurses who are interested to develop the skills, knowledge and attributes required for leadership and management roles in healthcare.

## **Specialisation in Extensive End-of-Life Care:**

Nurses who are taking on active roles and interested to develop their competence in the area of Extensive End-of-Life Care.

# Course Information

Programme Code:	MNARNF/MNARNF1 (through Pathway 1)/ MNMLF/MNEELCF/MNEELCF1 (through Pathway 1)
Programme Mode:	Face-to-face
Duration of Study:	1 year (full-time mode)/2 years (part-time mode)
Medium of Instruction:	English
Courses & Credit-units:	8-9 courses, with a total of 30 credit-units
Tuition fee (HK\$):	\$137,250 / \$109,800 (through pathway 1) Subject to the latest announcement by the University

# Programme Aims

Upon completion of this programme, students should be able to:

- Apply the updated knowledge and skills in providing holistic care to clients in the specialty area;
