# Update Saved Secure ID/Password on macOS

This guide outlines the steps required to update the saved Secure ID/Password for Secure Print at Apple OS X / macOS for HKMU Wireless Printing Service on campus.

1. When you send a print job and no Secure Print dialogue pops up which means you may have already stored the ID and Password at your Mac, i.e. "**Save Settings**" has been selected in example at right.
   You'll need to follow below steps if you intend to update the saved Secure Print ID and/or Password for a selected printer at your Mac.

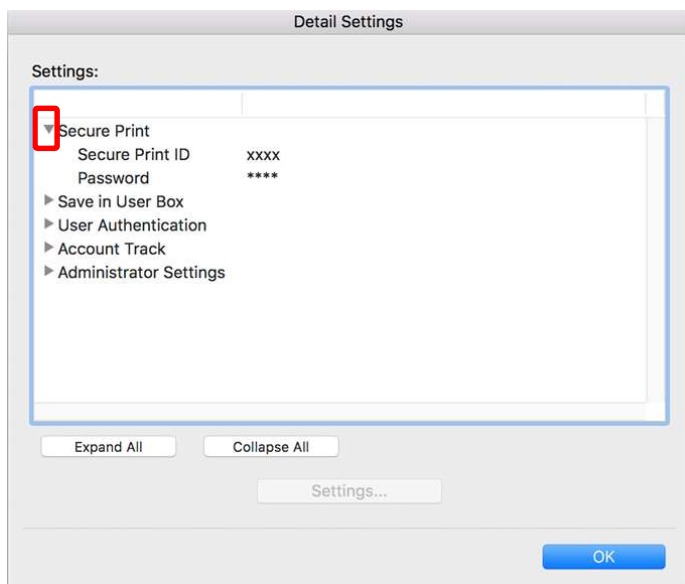

2. At application, click "**File**" -> "**Print**" -> select desire printer -> "**Show Details**" button

3. At the section drop-down menu, select **Output Method** -> **Detail Settings…**
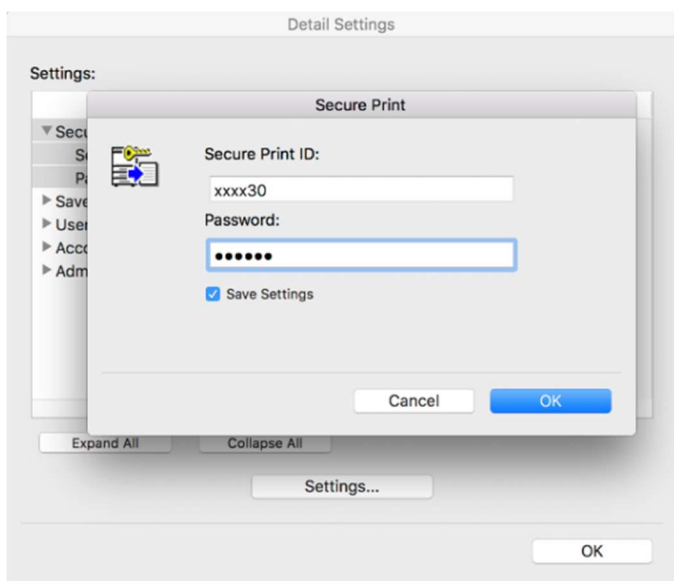

4. At "Detail Settings", expand the **Secure Print** by click on the triangle at its left

5. Double click anywhere on **Secure Print**, **Secure Print ID** or **Password** to bring up the "Secure Print" dialogue box.

   To change:
   - enter a new Secure Print ID in the **Secure Print ID** text box, or/and;
   - enter a new Password in the **Password** text box.

   Click "**OK**" button to accept the change.

6. Repeat the steps onto another printer one by one.
